The perception system of the touch panel used for the EyeSpecial C-III is different from the ones of smart phones. Gently touch the screen with your fingernails or tip of your finger.

You can also operate this camera with function keys (small silver buttons) on the camera frame outside of the touch screen. For more details, refer to page 10 in the User’s Manual.

**Operation methods**

Most of operations can be done by touching the screen directly. You can also operate with gloves or by using the tip of a stylus.

**Tips**

You can also operate this camera with function keys (small silver buttons) on the camera frame outside of the touch screen. For more details, refer to page 10 in the User’s Manual.

**Taking pictures**

1. **Input of patient information (optional)**
   For more details, refer to page 20 in the User’s Manual.

2. **Select the shooting mode**
   Press [Mode] to display all shooting modes preinstalled. Select the optimal one for each purpose.

   Return for taking photos.

   Press here to alternate between mode details and mode list.

   For more details on each shooting mode, refer to the back of this Quick Reference.

3. **Select the magnification ratio**
   Adjust the magnification ratio by rotating the dial key. (You can’t change the magnification ratio by touching the screen.)

4. **Set the focus distance**
   Based on the optimal focus distance displayed on the upper area of the screen, adjust the distance between the camera and the subject. Change the camera position until the subject appears on the screen sharply.

5. **Focus and take pictures**
   Half-press the shutter button to focus. When properly focused, the green focus indicator appears on the right bottom of the screen. Then, press the shutter button completely down to capture the photo.

**Turn the camera on**

Rotate the power switch to turn the camera on.

When the start screen appears on the display, press any key or touch the LCD screen and you can start taking pictures.

When you turn the camera on for the first time, you may need to set the language, date, time and units. For more details, refer to page 16/17 in the User’s Manual.

Learn more about formatting SD memory cards on page 36 in the User’s Manual.

Should you inadvertently press any keys while shooting and a different menu appears, half-press the shutter button to return to the shooting mode.

You can attach the patient ID to the pictures or you can register your custom settings in the camera. For more details, please refer to page 20 in the User’s Manual.

**Viewing your image**

- Touch the key in shooting mode to change to the playback mode. The last picture you took is displayed.
- Rotate the dial key to scroll through the pictures.

**Magnifying image**
- If you touch any area other than the arrows it’s centered on the screen.

**Thumbnail images**
- To display a single image, select one by touching it on the screen.

**Erase images**
- If you wish to erase the image, press “OK” to proceed. Or press “CANCEL” to cancel erasing.

**Installing batteries and insert SD memory card**

- **Installing batteries**
  - Compatible batteries: 4x AA (rechargeable AA nickel hydride batteries (NiMH) or alkaline batteries)

- **Inserting SD memory card**
  - Compatible SD memory cards:
    - up to 2 GB
    - 4 to 32 GB
    - 64 GB or larger

**Shooting modes**

- **Standard**
  - For standard intraoral photography

- **Low-glare**
  - For taking detailed pictures of anterior teeth, working models and indirect restorations

- **Surgery**
  - For intraoral photography from a distance

- **Whitening**
  - Optimal for shade comparison before and after whitening / bleaching

- **Mirror**
  - For intraoral photography using a mirror. The image can be flipped by 180 degrees.

- **Tele-macro**
  - For taking pictures of anterior teeth, indirect restorations and working models in higher magnification
  - Attach the provided close-up lens when taking pictures in this mode.

- **Face**
  - For shooting facial profile and/or upper torso

**Edit functions**

- Press the MENU key while displaying an image you wish to edit.
- 1. Draw on images
  - Draw lines on the images by touching the screen.
- 2. Rotate images
  - The images can be rotated by 90 degrees.
- 3. Protect images
  - Protect the images to avoid accidental deletion or unintended editing.

For more details, please refer to page 34/35 in the User’s Manual.
