## OneGloss M = OneGloss = OneGloss PS

One-step finishers and polishers for composites and enamel

These one-step silicone polishers, impregnated with alumina, allow you to perfectly finish and polish all types of composite restorations, simply by varying the contact pressure step by step from finishing to polishing – without instrument change and polishing paste!

The product line includes four shapes which are optimally matched to the surfaces to be treated. The OneGloss M instruments, with heads mounted on stainless-steel contra-angle shanks, are sterilisable. The unmounted OneGloss instruments and the OneGloss PS instruments, with heads mounted on sturdy plastic mandrels, are disposable.
